16	Shower arm Decoration cover	1

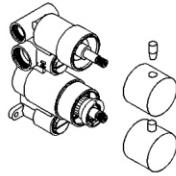

## 2. Installation steps

### 2.1 Disassemble the hand wheels and panel

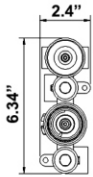

2.11 Factory settings

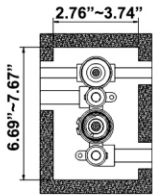

2.12 After removing the black covers, use the small wrench in the adaptor Kit. Loosen the screws in the handles by hand and remove the handles. When removing the thermostatic handle, be sure to keep the thermostatic button aligned with the 40 °C in the panel. Do not turn the valve stem (There is a straight red or black line). Otherwise, the temperature will be inaccurate.

### 2.2 Size for grooving and assembly

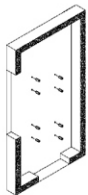

2.21 Main body size (for your reference, check actual size)

2.22 Wall grooving design and size. (for your reference)

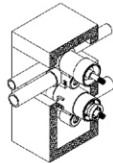

### 2.3 Main body built-in steps

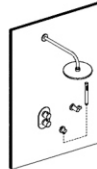

2.31 Drill the hole in the wall. Beat expansion strip into the hole (there are 2 pieces expansion strips and 2 pieces self-tapping screws)

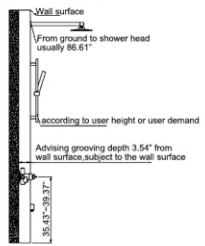

2.33 After tiling, assembly panel, decoration covers, handles in order, tighten the screw and put chrome cover into the original place.

2.32 Put the main body into the wall. Fixed with self-tapping screw. (please do not seal all the copper parts of thermostatic valve, and make sure it is easy for long-time maintenance.)

2.34 Effect diagram

2.24 Joint pipe diagram

2.23 From ground to main body usually 35.43"-39.37" also can according to user height or user demand

## CLEANING CARE

In order to keep the appearance of faucet clean, bright and good performance, please take care of the faucet as follows;

1. Rinse with water only and dry with soft cotton cloth;
2. Use mild liquid and colorless glass cleaner to remove surface dirt and scale film, or use polish without abrasive effect;
3. Do not use abrasive detergent, polish, emery cloth, paper towel or scraper, etc.;
4. Do not use acid cleaner, or cleaner and soap with insoluble gran etc.;
5. In the process of use, mud may accumulate in the bubbler and make the water flow show. The bubbler can be unscrewed, rinsed with water, and then installed back in place.
